Project

George Mason University:
Fenwick Library

Products

Privee

Year of completion

2016

George Mason University expanded Fenwick Library to 150,000 square feet of new space to become the largest library in their system. The spaces utilizes Privee's ability to dissipate sound with its canopy design. This is perfect for the open library spaces giving students the ability to communicate with one another without distracting peers. The spaces features a light that ideal for reading, as well as power and USB ports to charge laptops, tablets and other mobile technologies.
