

Zero 9
design Giovanni Baccolini

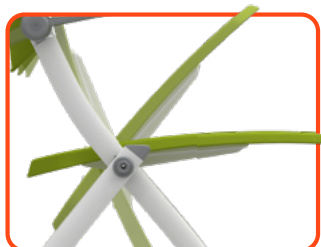

PIVOTING ARMS

Fold armrests out of the way as a user preference or for easy accessibility. Pivoting arm design also allows for space-saving stacking and nesting.

FLEXIBLE BACKREST

The pivoting backrest tilts up to 14 degrees making the Zero9 top of its class in both comfort and support. This movement is achieved by two metal springs in polished die-cast aluminum casings.

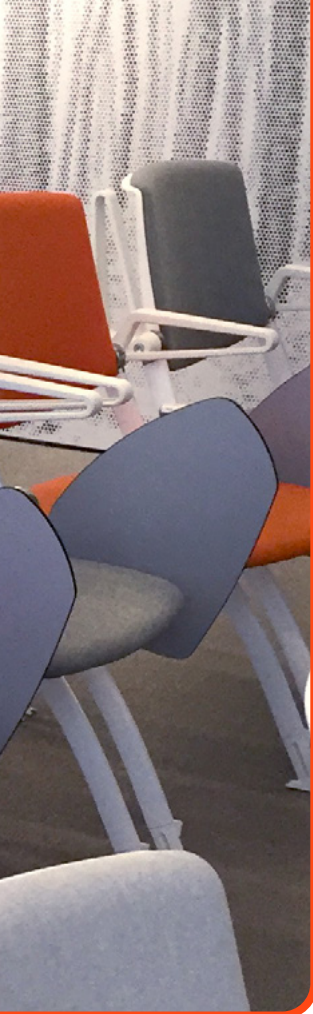

FLIP-UP SEAT

The Zero9 is an award winning multi-purpose chair. Its flip-up seat design allows for maximum density - nesting 5 chairs takes up only 35" of space.

GANGING

With a rugged built-in ganging mechanism the Zero9 can easily be utilized for conference and training spaces. All units are capable of ganging with and without a tablet.

AWARD WINNING FUNCTIONALITY

The Zero9 is a highly comfortable, multi-functional chair suitable for public spaces and work environments. This award winning chair has its design enhanced by the fine finishing materials and the availability of a wide range of models, all of which can be stacked horizontally or nested vertically.
