

UNIQUELY ENGINEERED

With the Fila chair, Borgo looks back at history to use machines to create the spirit that was once the Arts and Crafts Movement. The assembly of the many unique machined parts of Fila, introduces the assembler to the traditional skills and crafts that were once synonymous with wood working. At first glance all piece look similar but each are uniquely different. The rows ("fila" in Italian), of the wood spindles, which run up and down the seat and back, each one is slightly different, and spaced to offer the right amount of comfort and support. Fila is available as a side chair and arm chair, and showcases how a traditional material such as wood, can be elegant, functional and comfortable.

Fila

FEATURES

- Chair is constructed of a solid beech wood frame.
- All wood is kiln dried or air dried to ensure the integrity of the frame.
- Back and seat are constructed of rows of spaced wood strips.
- Arms are made of solid wood, supported by metal powder coated rods.
- White nylon glides.

OPTIONS

- Custom wood stains upon request.
