

GEORGE MASON UNIVERSITY

Fairfax, Virginia

EDUCATION

George Mason University expanded Fenwick Library to 150,000 square feet of new space to become the largest library in their system. The spaces utilize Privee's ability to dissipate sound with its canopy design. This is perfect for the open library spaces giving students the ability to communicate with one another without distracting peers. The spaces feature a light that is ideal for reading, as well as power and USB ports to charge laptops, tablets and other mobile technologies.

Project

George Mason University:
Fenwick Library

Products

Flex and Privee

Year of Completion

2016
